

CORNWALL &
ISLES OF SCILLY
GROWTH
PROGRAMME

PROGRESS TO DATE **MARCH 2021**

Cornwall and Isles of Scilly Growth Programme

What is the Growth Programme?

The Cornwall and Isles of Scilly Growth Programme is the European economic regeneration programme for the region. Running from 2014-2020 it contributes to the EU ambition to deliver smart, sustainable and inclusive growth.

Over a hundred projects have received funding through the programme and many are delivering until 2023.

Investment to date

Total number of projects: 147

Total EU investment: £425m

Number of ERDF projects: 94

Total ERDF investment: £330m

Number of ESF projects: 53

Total EU investment: £95m

Funding allocation

- Research and Innovation €91m
- Information and Communications Technology €19m
- Business Competitiveness €172m
- Low Carbon Economy €76m
- Climate Change Adaptation €12m
- Preserving the Environment and Resource Efficiency €13m
- Sustainable Transport €58m
- Community Led Local Development €11m
- Local Economic Covid-19 Recovery Action Plans €0.6m

- Access to Employment for Job-seekers and Inactive People €27m
- Access to Employment for Young People €12m
- Active Inclusion €48m
- Community Led Local Development €7m
- Enhancing Equal Access to Lifelong Learning €30m
- Education and Training Systems to Improve the Labour Market €28m

Sustainable Lives

'Sustainable Lives' sparks new career ambitions

Two years ago Gemma's son started primary school, leaving her isolated and searching for a new positive direction for her life. A chance meeting with an old friend led her to join the EU funded Sustainable Lives project in Newquay, and step into a new exciting future.

European funding from the Cornwall and Isles of Scilly Growth Programme is playing a vital role in transforming residents' lives, investing in projects to help residents develop new skills and qualifications so they can progress their careers or find employment.

One of these projects is Sustainable Lives. Set up by Newquay Community Orchard, a green space built by the community offering opportunities for volunteering and education, Sustainable Lives is a ground breaking community programme designed to give people the opportunity to learn simple self-sufficiency skills as part of a wider ambition to create a better and more sustainable future for all.

Single parent Gemma moved to Newquay when her children were very small. Having given up her previous career to focus on meeting the needs of her autistic daughter and young son, she found herself feeling isolated when he joined his older sister at school.

After hearing about Sustainable Lives during an after school cooking session at her son's school,

Gemma went to a breakfast club at the Newquay Community Orchard site. Following an outdoor cooking class at the orchard, Gemma then decided to get involved with Sustainable Lives and started cooking at the volunteers' lunch club.

Liaising with the centre's horticultural club to choose fresh produce for the meals led to an interest in the principle of growing, harvesting, cooking and then eating food.

"While I knew the word 'sustainability', I had not really thought about what it meant in practice," she explained. **"I then had the chance to attend a Climate Change Summit held at Eden where I heard an amazing talk from one of the guest speakers. This made me want to do something more and I came home and immediately began looking at courses in sustainable development."**

Having been accepted on a Masters' course at the University of Sussex, Gemma is now juggling part time study with caring for her children.

Gemma remains excited about the future and is looking at the possibility of becoming a sustainable development consultant. **"Becoming part of Sustainable Lives changed my life,"** she said. **"I would not have gone down this path if it had not been the support I have received from the project."**

Case Study – Morek Engineering

Funding helps marine business grow

Naval architect Bob Colclough has a passion for marine renewable energy and has spent his career exploring the use of new technologies to help create a better and more sustainable future. 18 months ago he set up his own company - Morek Engineering - to provide specialist technical consultancy services to deliver offshore wind, wave and tidal projects across the world, and now, with the help of European funding, is working with partners to create new opportunities in the south west for the fast growing floating offshore wind market.

“I have always had a particular interest in projects which generate clean energy using the power of the sea, and in exploring the use of low carbon technologies to reduce the impact of marine transportation. I have also been involved in looking at ways to tackle marine pollution,” explained Bob.

“Setting up my own company has given me the opportunity to use my specialist naval architecture and marine engineering skills and experience to work on projects which will deliver these objectives and help to reduce the environmental impact of the marine industry.”

Since being launched in 2019, Morek (maritime in Cornish) has provided specialist consultancy services that focus on designing marine energy systems, including floating offshore wind platforms, moorings and cables and specialist offshore equipment.

As a new company based in Cornwall, Morek has benefited from support from a number of local projects which have received European Regional Development Funding (ERDF) through the Cornwall and Isles of Scilly Growth Programme. These include the Growth Hub, which helped the team to develop its legal documentation, and provided accounting, finance and marketing support; PROPEL Cornwall which provides business support to the marine industry, and Tevi which provided funding for Morek to develop its sustainability policy.

Morek’s team are now working with the research, development and innovation programme Marine-i, also funded by ERDF, on developing sector leading software to optimise their seafastening design process for offshore operations.

“Support from these organisations has played a key part in our development and growth. Many new companies don’t realise this support is available or how important is to develop their business,” said Bob.

“During the past 18 months we have worked hard to develop a stable pipeline of work and are now an established company. We are now looking to build on this strong foundation and focus on delivering our key objectives of supporting marine renewable energy projects, developing low carbon shipping and tackling marine pollution.” www.morek.co.uk

Case Study – Bennamann

Innovative company creating ‘green fuel’

An innovative Cornish company is putting Cornwall at the centre of a local clean energy revolution – thanks to its ground breaking work in creating a new ‘green’ fuel from organic materials such as cow manure and grass cuttings.

Established in 2011, Bennamann is based at a dairy farm to the west of Truro, and an office and workshop space in Sector 2, the flagship gateway development at the Aerohub Business Park near Newquay, developed by Cornwall Council, with co-funding from the European Regional Development Fund (ERDF) as part of the Cornwall and Isles Scilly Growth Programme.

Working with a range of partners and local farmers, the award-winning company is exploring the use of new technologies to turn organic waste from farms into biomethane, a zero-carbon fuel that can be used to power lorries and tractors, heat households and businesses and provide hot water and gas for cooking.

“We are passionate about delivering a local clean energy revolution that brings commercially viable, sustainable production and distribution of small scale farm biomethane sourcing to the market place” said Chris Mann, Bennamann co-founder and Chief Executive.

Bennamann is currently working with Cornwall Council and Corserv on a pilot project which will see

slurry from six of Cornwall’s tenant dairy farms turned into the alternative fuel.

If the pilot scheme, believed to be the first of its type in the world, proves successful, the revolutionary technology will be considered for roll-out to more farms in Cornwall Council’s Farms Estate, helping Cornwall to achieve its net-zero carbon by 2030 target.

Bennamann is also working on an exciting £1.22m research and development project to establish an independent energy farm in Cornwall.

Part funded by an ERDF grant, with support from the Cornwall and Isles of Scilly Local Enterprise Partnership, Cornwall Development Company, Exeter University and Chynoweth Farm Partners, the Energy Independent Farming project is looking at ways to maximise the use of on-site renewable energy resources to supply all the energy needed for a dairy farm.

As well as enabling farms to become low-carbon by using animal waste to deliver energy, the project is also looking at using other technologies to help them to become more energy independent and sustainable. Any surplus energy production will be made available for local sale and use, creating added income for their businesses.

New Projects

Adaptive Scilly

Led by Council of the Isles of Scilly, the Adaptive Scilly project focuses on adapting the islands to the threats of existing and future flooding and erosion to its community, wildlife, economy, and scarce water supply. The programme of environmentally sensitive improvements, designed to reduce floods and coastal erosion, will increase community resilience to the impacts of climate change.

ERDF: £2,196,787

Isles of Scilly

Boosting Careers with Digital Skills

Managed by Digital Peninsula Network, this project is focused on upskilling members of the workforce who experience in-work poverty. It is delivering a range of digital skills complemented by Basic Skills training to enable participants to progress their careers and address issues of in-work poverty. www.digitalpeninsula.org

ESF: £650,505

Cornwall & Isles of Scilly

Creative Growth Programme

The Creative Growth Programme, run by Creative England, provides specialist support to businesses in Cornwall and the Isles of Scilly working in the wider creative sector and specifically in the supply chain to the film and TV production industry. It also supports new market entrants to ensure they are well placed to start and grow their own business.

www.creativeengland.co.uk

ERDF: £459,243

Cornwall & Isles of Scilly

Deep Digital Cornwall

Deep Digital Cornwall is giving businesses access to research skills, knowledge, data and facilities to carry out digital research and development of innovative products and services in sectors related to the underground environment and its connections to the surface. The project is creating a new 'Deep Digital Cornwall' Hub on the Penryn university campus. [More information](#)

ERDF: £3,313,761

Cornwall & Isles of Scilly

Drive EV2

The DRIVE EV2 project is extending the deployment of electric vehicle charge points through Cornwall and the Isles of Scilly. It is enabling the transition to more efficient Ultra Low Emission Vehicles (ULEVs) by deploying a minimum of 150 fast/rapid EV charge point units.

ERDF: £2,900,000

Cornwall & Isles of Scilly

Kickstart Grants

Kickstart grants were part of the Government's response to Covid-19 and supported businesses in the tourism sector and the wider economy. Applications for the scheme, which was managed by the Cornwall and Isles of Scilly Growth Hub, exceeded the funds available and it will not be reopening.

Research and Innovation - delivered

AeroSpace Cornwall (phase 1) - aimed to increase the supply chain cluster in the Space and Aerospace sectors, create highly skilled jobs and launch new products to the market place. Followed by Phase 2. ERDF ££3,197,481 | Cornwall & Isles of Scilly

EPIC (E-Health Productivity & Innovation in Cornwall) — aimed to develop a sustainable and growing digital health market with new high-value jobs, products and services. Followed by EPIC 2.

ERDF: £3,413,141 | Cornwall & Isles of Scilly

Debit Escrows and Smart Contracts in FinTech - innovation in consumer-facing financial technologies (FinTech) to better facilitate digital payments. ERDF: £509,473 | South East Cornwall

Diagnosticap - commercialisation of Diagnosticap, a new early stage urine test, developed and patented by Thalamus Health Ltd, which makes point-of-care diagnostics more accurate, efficient and hygienic.

ERDF: £933,128 | Cornwall & Isles of Scilly

Marine-i — supported innovation in the marine sector across four themes: marine energy, marine manufacturing, maritime operations and marine environmental technologies. Followed by Marine-i 2.

ERDF: £6,851,462 | Cornwall & Isles of Scilly

Smartline — analysed data from participating homes in Cornwall to help identify the requirements and market potential for new eHealth / eWellbeing products and services. Followed by Smartline Extension. ERDF: £3,780,374 | Cornwall & Isles of Scilly

Digital Connectivity

Superfast 3

The Superfast 3 project will extend access to superfast (30+Mbps) and ultrafast (100+Mbps) broadband to over 500 businesses in Cornwall and the Isles of Scilly, focusing on areas with broadband speeds of less than 15Mbps, areas where not all premises can currently access superfast broadband and the most deprived areas.

www.superfastcornwall.org

ERDF: £4,200,000

Cornwall & Isles of Scilly

Superfast Satellite Terminals

This project is delivering satellite broadband access to small and medium sized enterprises in rural and remote areas across Cornwall and the Isles of Scilly where there is no access to connection speeds of at least 2Mbps. This enables small businesses without fibre broadband to benefit from superfast access to the internet.

www.avantiplc.com

ERDF: £1,202,711

Cornwall & Isles of Scilly

Digital Connectivity - delivered

Superfast 2 - further extended the superfast and ultrafast broadband networks to drive increased connectivity and help overcome peripherality from markets. ERDF: £8,995,136 | Cornwall & Isles of Scilly

Superfast Business Cornwall - enabled businesses to better understand and exploit the opportunities offered by superfast broadband. ERDF: £2,984,444 | Cornwall & Isles of Scilly

Business Support

Access to Finance

Oxford Innovation's Access to Finance project is aimed at small and medium sized enterprises in Cornwall and the Isles of Scilly that need support to secure finance. Businesses can attend workshops on how to make appropriate financial choices, receive one to one support and benefit from the development of a financial support network. www.a2fcornwall.co.uk

ERDF: £2,984,900

Cornwall & Isles of Scilly

Acceleration Through Innovation 2 (ATI 2)

Building on the first ATI project, ATI2 continues to deliver high value, high impact interventions by providing acceleration support to innovative SMEs with the potential to commercially exploit new ideas and technology to develop their business. The project is led by the University of Plymouth.
